CopiBook OS: high image quality with no compromise on productivity

The fourth generation of CopiBook range has been designed to satisfy the most demanding end-users, especially in terms of image quality. Compliant with **ISO 19264-1 (level B), Metamorfoze light and FADGI 3*** standards, the CopiBook OS comes with the E-XTRA camera, a new camera embedding the **TrueColor technology**: 600 dpi optical resolution and no moiré pattern.

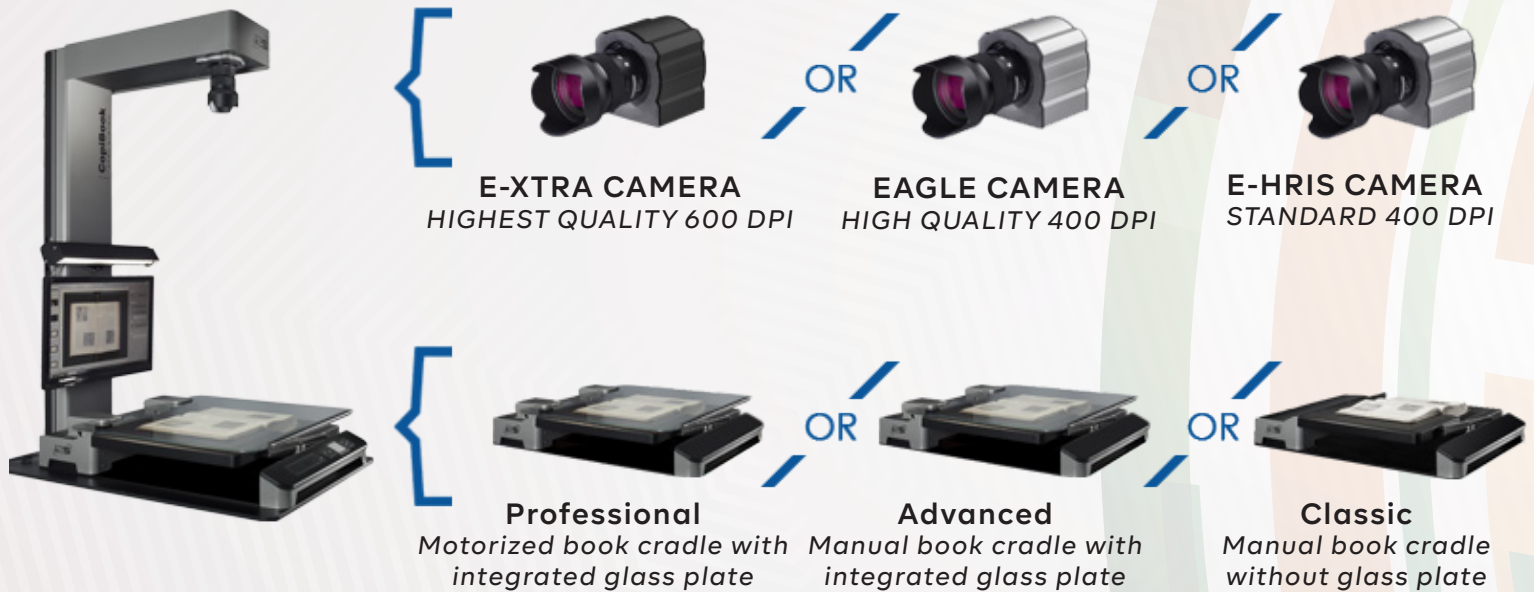

On the A2 format market segment, the CopiBook OS remains the reference thanks to its high productivity, user-friendliness and robustness.

CopiBook OS, a fully configurable book scanner to cover all your needs

In order to better match end-users requirements, i2S made this new CopiBook model an "Open System". It means that you can select your camera, your book cradle model and software interface.

About i2S

SOLUTIONS FOR YOUR DIGITIZATION PROJECTS

i2S is a company specialized in image capturing and processing technology.

We work for international clients, on a wide range of markets like: health and well-being, sport, software, document digitization, food-processing and agriculture, aviation and aerospace, robotics and industrial control systems, and more generally, wherever image capturing is required.

i2S creates and markets a whole range of scanners and software intended for historical archives and bound documents digitization and promotion. Most of our customers are content owners such as museums, libraries, archives, administrations and a few large companies.

Our clients value our innovative solutions which encompass the complete process of a digitization project: capturing, processing, enriching and sharing. In order to meet the need for digitizing varied and precious collections, we designed the largest range of book scanners on the marketplace – from the smallest size to 2A0 format, including robot scanners.

Today, more than 4.000 book scanners are installed at more than 1.000 customers' sites around the world.

At i2S we work with passion and dedication for our customers, taking up the challenge of putting innovation at the service of digitization projects efficiency.
